Solar Tile Series

SolarCap's wireless lighting solutions can give any outdoor lighting project the beauty and ambiance with ease and convenience you've never before experienced.

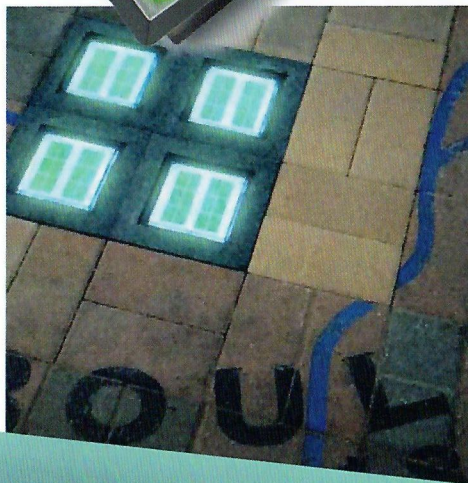

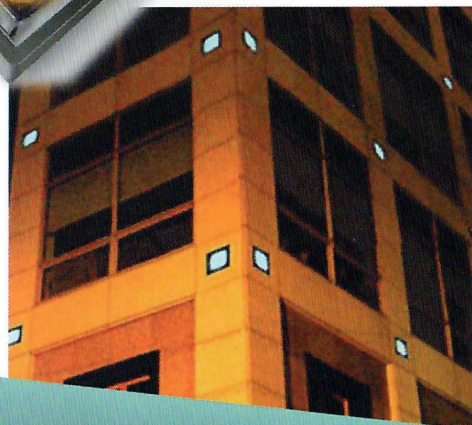

Beautiful and elegant, Solar Tile series comes with custom imprint option up to 4 colors. Comes in different sizes, colors and mode to suit your needs from building facades to walkways.

NST0808

NST0408

Traditionally, nightscaping has added beauty and ambiance to outdoor landscaping and parks, but it is also a huge undertaking. Trenching and wiring lead to a time-consuming and costly installation.

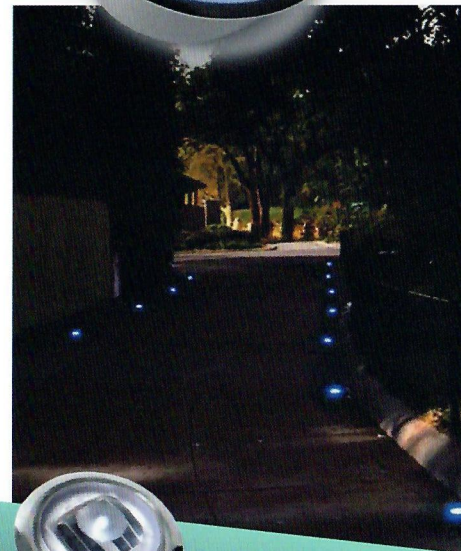

Ground Flasher Series

The Ground Flasher series is ideal for outdoor gardens, patios, decks, pools, walkways, trails and parks.

Available in slow and fast flashing lighting modes, easily catches one's attention and is suitable as path guide lighting without glare.

GF80

GF50

Road Marker Series

Road safety is paramount and should not be compromised. SolarCap's Road Marker series significantly improves visibility in adverse weather conditions. It is visible from up to 800m away, making it a safety beacon for drivers. Constructed from single piece cast aluminum for heavy duty application, it is also snow plowable.
